

## LANDSCAPE DESIGN AND GROUND MODELLING SOFTWARE

### Who?

Landscape Architects and  
Landscape Designers

### What?

A single solution that enables  
you to quickly create small or  
large landscape projects

### Why?

Cuts your design time in half,  
eliminates errors and  
improves collaboration

#### WHO IS KEYSCAPE FOR?

KeySCAPE is made for landscape architects and landscape designers.

#### WHAT IS KEYSCAPE?

KeySCAPE is an add-on for AutoCAD which offers a comprehensive suite of tools enabling you to quickly create small or large landscape projects without the need for additional software.

#### GENERATE A TOPOGRAPHIC FROM SITE DATA

#### CREATE SECTIONS FROM GROUND MODELS

## WHY CHOOSE KEYSCAPE?

KeySCAPE relies on a single source of the truth. Its extensive features inside one AutoCAD package mean there is no need to keep switching between multiple applications or maintain several copies of files in different locations, just create and edit once. This reduces the risk of error, saves you time and aids smooth collaboration on projects.

The flexibility of KeySCAPE allows you to customise the system so workflows can be streamlined. Compliance to industry standards means more time can be spent designing and less time ensuring conformance.

## KEYSCAPE LT

KeySCAPE is available to run on the currently supported versions of AutoCAD and Windows and is available as a standalone application (KeySCAPE LT) that includes its own AutoCAD (OEM) engine.

# KEYSCAPE AT A GLANCE

- Create ground models direct from point data contours
- Calculate volumes and optimise your site design
- Analyse your site for slopes, water run-off and flooding
- Assess and mitigate for the impact of new features to be placed within the landscape
- Database of over 8000 plants
- 3D visualisation and plotting tool

***“We have been really impressed with the flexibility that the KeySCAPE software provides in terms of tailoring graphics and specifications for individual projects.”***

Nicola Brown (BA) Hons, BlandArch, CertUD, MLI, Director,  
David Huskisson Associates
